

Adelphi H-5061

Water Based Coating for Plastic

Adelphi H-5061 is water based low VOC paint for PVC Tarpaulins. Adelphi H-5061 is a one-part flexible urethane paint with outstanding adhesion to PVC and other plastics. It is easy to use, spray viscosity and fast drying. It develops water and ice crinkle resistance rapidly after spraying. Clear base offers exceptional transparency and gloss. Offers excellent flexibility and outdoor weather ability.

It is an excellent choice for flexible film package printing and protective coating for decorated plastics. As a protective coating, it helps resist plasticizer migration.

Solid Contents wt%	Viscosity cps	Tg C	Parts
51	2000	-42	1

Highlights:

- Water based with excellent adhesion to plastics
- Clear and fast dry
- Resistant to water
- Flexible – will not crack when flexible PVC tarps tightly wound for storage
- Durable even when exposed to the most extreme outdoor conditions
- Comes in all colors and glosses including gloss requirements for Mil C 46168

Uses:

- Coating for Tarps - Originally developed and formulated for painting US Army jeep covers
- Meets the IR reflectance values of Mil C 46168
- Printing for flexible film
